

Leading in Context

Business Challenge

Leaders must deliver results through others, which can be difficult in today's multi-cultural, multi-generational, and increasingly global business world. In leadership, context is everything, and effective leaders meet the particular demands of a situation by utilizing five different leadership styles as appropriate. Most leaders lack the ability, however, to deploy all five leadership styles with seamless and authentic versatility, developing instead one or two dominant styles. Developing versatility requires intentional practice so that leaders are able to use leadership styles that may seem inauthentic at first.

Target Audience

Mid-level leaders can learn and apply best practices from Leading in Context, as well as leaders of other levels who can benefit from deploying a context-specific leadership approach.

Our Solution

This module helps leaders learn and apply skills for utilizing a variety of leadership styles to fit the situation. Via videos, lively conversations, and real-life practice, participants will increase their ability to lead in different contexts.

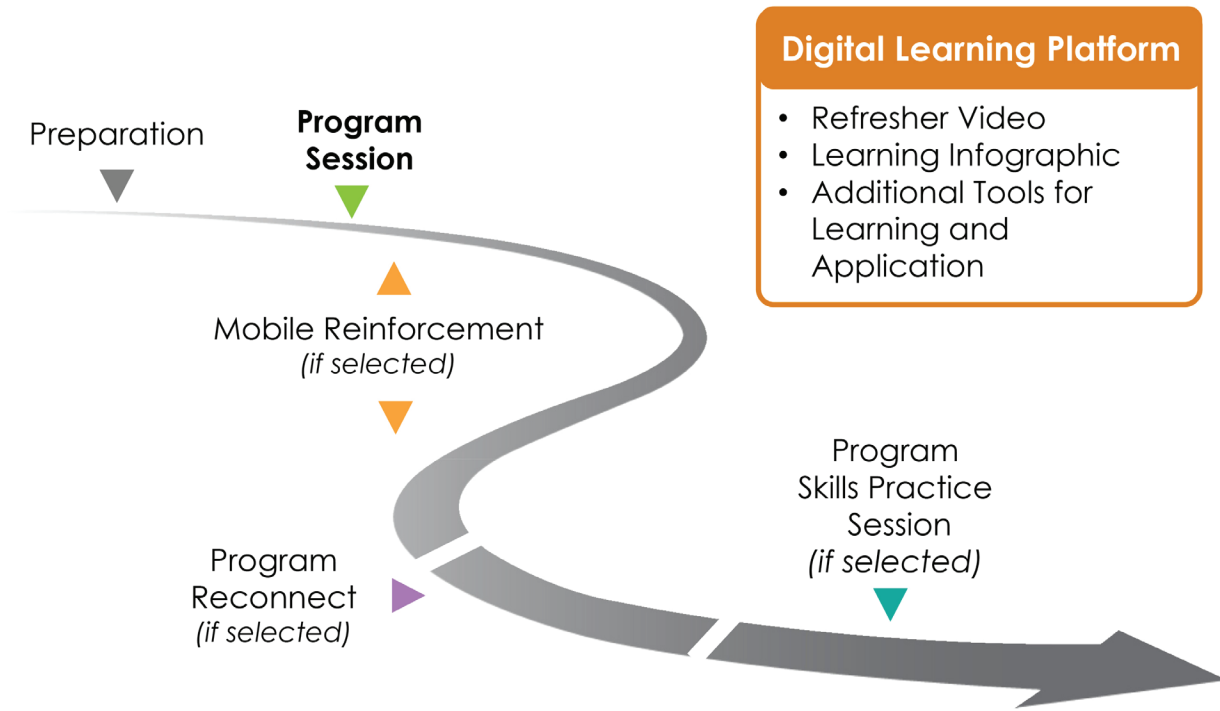

This program will enable your leaders to:

- Explain the impact of five core leadership styles on performance
- Identify their own preferred leadership style(s)
- Select and apply the behaviors of leadership styles they use less frequently
- Increase their comfort level while using unfamiliar leadership styles
- Deploy a context-appropriate leadership approach

This program contains the following key content:

- **Leadership Styles:** Participants identify which of the five leadership styles they are strongest in. They learn how to implement all five styles and determine when it is appropriate to use each one.
- **Developing Versatility:** Participants expand their leadership approach versatility by learning and applying four steps, including planning for and practicing a non-dominant approach in an appropriate context.

Learning Journey

Driving Measurable Results

We help organizations drive performance that generates measurable, sustainable results through helping you achieve leadership excellence at every level of the organization. Our research into high-performing leaders and organizations forms the basis of all our learning solutions.

About AchieveForum:

AchieveForum delivers leadership solutions that are designed for the customer and are built on more than 85 years of global experience. Our tailored learning solutions are created with purpose and driven by innovation to help organizations effectively execute their business strategies. We provide clients with practical and research-based products and programs that mobilize employees, accelerate business-initiative implementation, and improve agility. For more information, go to:
